HPLC 2016

44th International Symposium on
High Performance Liquid Phase Separations
and Related Techniques

June 19-23, 2016 • Marriott San Francisco Marquis • San Francisco, CA, USA

SYMPOSIUM CHAIR
Professor Robert T. Kennedy

SYMPOSIUM ORGANIZER
Professor Edward Yeung

SYMPOSIUM/EXHIBIT MANAGER
Ms. Janet Cunningham, Barr Enterprises

HPLC 2016

44th International Symposium on High Performance
Liquid Phase Separations and Related Techniques

Mark your calendar to attend HPLC 2016. The HPLC conference has grown over the years to become the largest and most recognized international scientific conference series in the world dedicated to all aspects of liquid phase separation science. This is the premier meeting of one-stop shopping where you will find the world's leading experts who will deliver cutting-edge presentations on emerging technologies, discuss novel solutions for every application, address practical and economical issues and challenges related to all aspects of liquid phase separation science techniques, and where you will find the largest annual exhibit for separation science.

There are several components to the HPLC series of symposia that make it such a valuable resource for analytical chemists, biochemists, molecular biologists, mass spectrometrists, and those in the separation sciences seeking practical solutions. One of the key aspects of HPLC 2016 is its extensive technical program of invited and contributed lecture presentations and poster sessions which focus on providing practical solutions to address the diverse challenges faced by today's scientists. Other important components are educational programs taught by leading instructors; short courses designed to allow you to gain insights into the latest, most popular areas of liquid-based separations and apply them to meet your specific needs; and workshops focused on providing quick, effective tools and techniques to address various practical problems.

Please keep visiting our web site for new information as it becomes available.

WHY IS THIS MEETING VALUABLE?

- **New Science:** extensive technical program with leading companies and researchers
- **New Technology:** instrument showcase and presentations by vendors
- **Applications:** how to use modern HPLC to solve problems in your research
- **Education:** short courses and tutorials to learn about fundamentals and latest trends
- **Network:** informal meetings with colleagues
